1402	IWMAC ADAM Server	0	0	Permanently blocked	Connected	

Ny undermeny

Når man logger in til IWMAC så får man nå en ny undermeny.

Fra denne menyen kan man gå inn på sin annleggs liste fra "My plants" valget. Ved siden av denne vil man også finne det nye "KPI Dashboard" valget.

I fremtiden så vil denne menyen få et nytt design, For å passe produktene i vår portefølje bedre. Til slutt men ikke minst; når IWMAC Raport generatoren er en realitet, så finner man denne her.

Widget instillinger

Hver widget lagt til dashboardet kommer med egne instillinger.

Man kan legge til så mange widgets man vil, og justere innholdet som du vil.

I v.1 kan man endre tittel på widget, og hvor mange rader / instanser i hver widget.

Med widget instillingerne på plass er vi forberedt på avanserte widgets i fremtiden.
